1. WHAT IS MONEY LAUNDERING?

Modern society currently faces a serious challenge in preventing money laundering, e.g. making the possession, use, or disposal of money or other property obtained from criminal activities appear to be legal, and terrorism financing - providing or gathering money or rendering financial services with the knowledge that the money is intended to finance the organization, preparation for, or execution of terrorist acts or to support a criminal society (criminal organization) created or being created to perform terrorist acts.

Individuals and legal entities whose income is earned illegally make various attempts to legalize their income. For example, they may use other people's personal data, including data that has been acquired fraudulently. This may become a problem for people who become victims of fraud and are uninvolved in these parties' criminal activities.
